

## Prospectus

### Information for Prospective Authors:

Authors interested in contributing to the series should prepare a short prospectus for a proposed volume of less than about 300 pages. Include a paragraph (or a maximum of two) describing the proposed volume, why the topic is important, and how it addresses the vision of the series (see below). Also include a list of the chapter (lecture) titles.

### Suggested format:

- 1) Title of the proposed volume
- 2) Brief description in one or two paragraphs.
- 3) Brief discussion of how the proposed volume aligns with the vision of the series.

Does it:

- a) Treat an important, new topic with a unique “point-of-view”?
- b) Treat an important topic in a way that transcends disciplinary boundaries?
- c) Treat a traditional topic in science or engineering from the perspective of recent advanced in nanoscience?

- 4) Listing of chapter (Lecture) titles
- 5) Tentative delivery date for manuscript
