

Lessons from Nanoscience: Information for Prospective Authors

Authors interested in contributing to the series should prepare a short prospectus for a proposed volume of less than 300 pages. Include a paragraph (or a maximum of two) describing the proposed volume, why the topic is important, and how it addresses the vision of the series. Also include a list of the chapter titles, and send the prospectus to one of the series editors. Suggested format:

1. Title of the proposed volume
2. Brief description in one or two paragraphs.
3. Brief discussion of how the proposed volume aligns with the vision of the series.
Does it:
 - : a) Treat an important, new topic with a unique “point-of-view”?
 - : b) Treat an important topic in a way that transcends disciplinary boundaries?
 - : c) Treat a traditional topic in science or engineering from the perspective of recent advanced in nanoscience?
4. Listing of chapter titles
5. Tentative delivery date for manuscript

Please send your prospectus to the series editors:

:Mark Lundstrom (lundstro@purdue.edu)

:Supriyo Datta (datta@purdue.edu)
